# EXHIBIT 4
Filed Under Seal

As shown below, each **Android** YouTube app (except for the YouTube TV app) enables a user to select **a collection of media items** (e.g., an album, user-created playlist, service-provided playlist, etc.) for playback at the Sender. The following screenshots depict how a representation of the Sender's local queue loaded with data identifying one or more media items from the Watch Next queue is typically displayed by the Sender.

Android - YouTube Sender in Non-Casting Mode (Collection of Media Items)	
YouTube Main (Android) **[User-Created Playlist]**	**YouTube Music (Android)** **[Album]**

YouTube Kids (Android)
[Service-Provided Playlist]
